**AEROLITE is developing a self-contained Intensive Care Unit, (ICU)**

Aerolite AG will develop a new compact ICU for various fixed-wing aircraft. This ICU will include storage options, electrical / power supply and oxygen supply. The development will be completed with a prototype in about 6 months time. Many aircraft manufacturers (OEMs) have expressed their interest. AEROLITE is also developing a suitable system for loading patients, based on experience from previous solutions, to further develop and to fulfill the mission capability requirements of rescue organizations.

Product catalogs with dimensions, weight and prices can be provided upon request, offers with concept studies can be created for customers specific requirements.

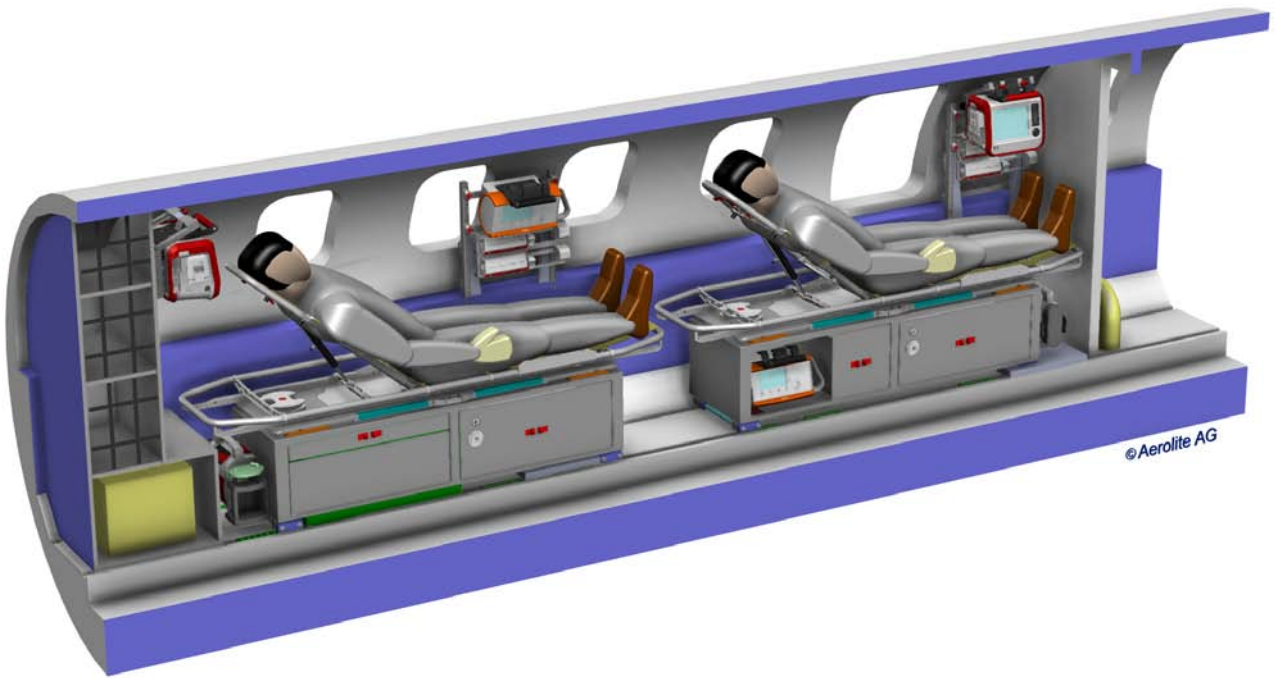

*See pictures on the following 2 pages.*

AEROLITE is a leader in design, engineering, production and installation of state-of-the-art Air Medical – and Corporate interiors. Our knowhow is based on over 500 delivered EMS and other interiors. The company hold EASA DOA, POA and MOA approvals and is ISO 9001, EN9100 and ISO 13485 certified.
