

MISSION EQUIPMENT: AEROLITE Roll-in Systems

w/ PackRack

Characteristics

AEROLITE has developed a new roll-in system which thanks to the ergonomic design provides easy loading and handling. Medical devices can be attached to the pack rack (stretcher bridge) which is certified for use during take-off, landing and flight which gives a seamless transfer of patients. Also an Incubator of up to 125 kg can be detached to the Roll-in System.

Attributes - Applications

EC145 & H145
